

# Lab Test Tracker

Your multiple myeloma (MM) treatment plan will include ongoing monitoring with lab tests (such as blood tests and bone marrow biopsies). These tests are very important. Your healthcare team will use them to track your progress, health, and any potential side effects of your treatment. As an active member of the team, you can also play a role in tracking your test results. This downloadable tracker can help.

## WHY IT'S HELPFUL

This tool helps you track important test results.

Lab: _____	Lab: _____
Phone Number: _____	Phone Number: _____
